### Lab 3: Functional Testing

The purpose of this lab exercise is to add some additional gates to our pipelines created previously. Gates include Unit testing of the front end code, server side API Tests. A new feature in the app will be implemented and put through these tests.

---

#### Step 1: Get the background on this lab exercise

In this lab exercise, you will:

- Implement a new feature in the application
- Write a new Karma test for the feature
- Implement the server side components for the feature
- Add Testing phases to Jenkins for interpretation.
