Lab 4: Non functional testing

The purpose of this lab exercise is to run some additional things in the build to assess code quality and performance.

Step 1: Get the background on this lab exercise

In this lab exercise, you will:

- Install Jenkins Codestyle Plugin.
- Add jshint to the build job
- Have Jenkins run some basic Performance testing (nightly)
- Add Coverage reporting to the build to assess the quantity of testing that has been completed.
