Lab 5: Scaling Jenkins & Ops Jobs

The purpose of this lab exercise is to provision some Jenkins slaves to run our builds, scaling jenkins into multiple nodes to be able to run them in parallel

Step 1: Get the background on this lab exercise

In this lab exercise, you will:

- Use Docker to create a slave jenkins node for running the builds
- Configure Jenkins to run jobs on the newly created slaves
- Create automated jobs for stop starting and creating additional slaves
