Lab 2: Build Pipelines & Ops Jobs

The purpose of this lab exercise is to provision some Jenkins slaves to run our builds, scaling jenkins into multiple nodes to be able to run them in parallel

Step 1: Get the background on this lab exercise

In this lab exercise, you will:

- Create a pathway to production using Docker and Jenkins
- Scale your production infrastructure using Docker compose
- Create automated jobs for stop starting servers
- Create automated jobs for getting server logs
